## APPENDIX A-4 MULTIPLE USE FORMULA TABLE

---

When restrooms are shared by both restaurant patrons and other business patrons (as they are in some major ski areas, for example), and where restrooms are not located in the restaurant and are not provided solely for the use of restaurant patrons, the following table will be used to determine the number of business fixture units to be applied as a credit toward the actual number of business fixture units for the use of both restaurant and other business patrons.

<u># of Restaurant Seats</u>	<u># of Fixture Units</u>
0-50	12
51-100	15
101-200	21
201-300	27
301-400	33
401-500	39
501-600	45
601-700	51
701-800	57
801-900	63
901-1000	69
1001-1100	75

The multiple use policy applies to both connection fees and semi-annual user fee billing. Existing accounts will retain any excess connection fee allocation resulting from the application of the multiple use credit.

In the table above, an eating establishment of each incremental seat count is eligible for the corresponding number of business fixture units to be credited toward the actual number of business fixture units counted. However, the above listed table also represents the minimum business fixture units for a restaurant of each incremental seat count. In the event that a limited number of toilets and lavatories are provided and the application of a multiple use credit leaves fewer business fixture units than the minimum, the multiple use credit is reduced so that the minimum number of business fixture units remain. Example: A restaurant with seating of less than 100 would be eligible for a multiple use credit of 15 business fixture units. If after applying the multiple use credit toward the actual business fixture unit count, the remaining business fixture units fall below 15, then the credit applied would be reduced so that the required number of business fixture units remain.
